4A and GE TRAM 451N

# Attach a clip to the system and insert the module

STEP 1

Attach the ECG mounting bracket to your ultrasound
system.

STEP 2
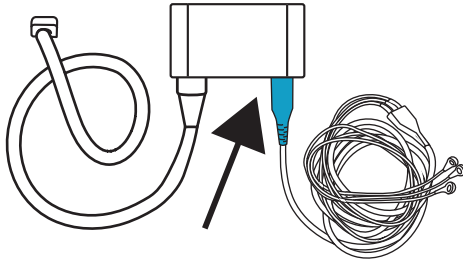

Insert the ECG Module into the mounting bracket.
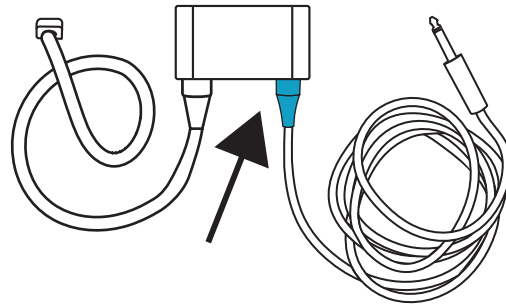

Connect a cable

STEP 3

Connect the lead wire cable to the ECG Module.   **OR**   Connect the external ECG connector cable to the ECG module and then directly to the Philips ECG patient monitor or GE patient monitor (adapter required).

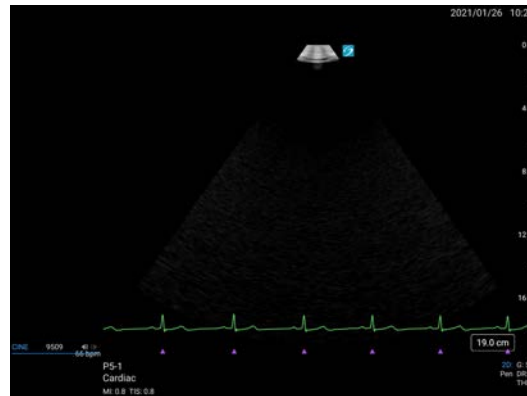

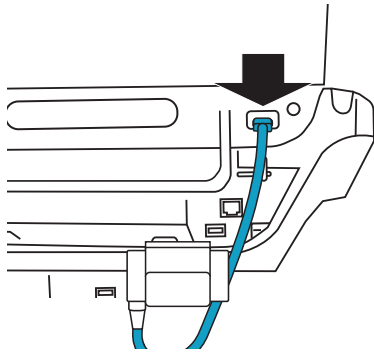

OR

STEP 4

Plug the ECG Module into the ECG port on the rear of the ultrasound system.

STEP 5

Verify the proper display of the ECG signal on the ultrasound system. You must use a cardiac exam type.
